Dear George W. Bush,

A "Pareto secure" network for those of "good faith" must be built.

The internet provides the neural system for information, as it were, but everyone is so paranoid that nothing moves one step forward.

One of the noteworthy things your father and his advisers accomplished is to put together 'Carrier Hotels' - what is now called Coresite, for example.

We have had our server in Market Post Tower from its early days. We have a box there that can accept 2 x 10G fibre connections plus 10 x 1G copper. We have the same at Hurricane Electric Fremont 2. Only one gigabit copper port each are in use.

Could you arrange courtesy all-expenses paid cross connects from major ISPs?

We run BGP as AS 262144. We would like those who can donate IPv4 and IPv6 Internet address space to 'swip' it to this AS and inform support@rayservers.com.

ARIN, LACNIC, RIPE NCC, APNIC, AFRINIC and all ISPs are subject to this Court of Record of YHVH. They must be informed.

We are very aware of the multi-gigabit nature of today's internet packet storms. You have already seen our letter to Google, published at www.courtofrecord.org.uk/Google/

The purpose of building this infrastructure is to build trade, rather than 'commerce'. 'Commerce', as you know is short hand for financial war, where one side sends stuff and the other side sends nothing.

We would like the network to have a point of presence in major carrier hotels. Those who are ready to donate space, power, engineer time, cross connects can coordinate their offers via yourself. This must be repeated in all 'countries'.

All ISPs, Carrier Hotels and others must "grow the fuck up" and stop depending on Government Issued ID, 'mandatory' insurance requirement, 'compliance' and other forms of money worship. Exodus 32 applies. They better work out how to know who has access to what without such ridiculous requirements.

They better read, comprehend and understand our Amicus curiae for Chartered Accountants: www.courtofrecord.org.uk/QE2-2-PDF

We suggest you assign a team at the CIA to get this letter communicated in no uncertain manner to those who run such infrastructure. We suggest that you make public their contact information and what message they are communicating!

More anon!

Yours faithfully,

Joseph Ray Sundarsson
