26<sup>th</sup> January 2011

## ***Public Notice to Heads of State***

To whom this presents shall come: greeting!

In upholding the highest traditions of English Civilization, this letter gives **notice** to Your Excellencies, that the Global Settlement Foundation (GSF), is an independent and sovereign organization that provides finality of settlement for global trade.

Common law ***notice of our intent and claim of right***<sup>1</sup> was hand delivered to Buckingham Palace on 20<sup>th</sup> August 2010, including an invitation to Her Majesty to issue *lawful money*, uphold *common law*, and thus restore the inherent sovereignty of man, as proclaimed by the Magna Carta, the root of *Dignity and Majesty* of the English Crown.

When the affidavit of John Harris<sup>2</sup> was published, a cry went out to the English speaking world for assistance in restoring common law, the *law of the land*, and to take steps to free people entrapped by certain powers, including perhaps, Her Majesty the Queen. Clearly, great dangers await mankind and the British Monarchy, if, today, not one nation on Earth can demonstrate that it upholds the principles of the said charter and lawfully affirm it.

The *Global Isles Court of Record* is in motion regarding this matter.

The Global Standard™, an open public standard for the issuance of lawful money, defines a gold Global™ as 0.1 gram by mass of 0.999 fine or better purity gold and a silver Isle™ as 0.1 gram by mass of 0.999 fine or better purity silver. All circulating notes and coins shall at all times contain at least 70% of the face value of the instrument with 100% of face value

2 See page 393 *et seq* of Finality of Settlement, Part II, Volume II.

deliverable in kilo bars at all times.

A sophisticated database system ensures that a clear lawful title can be established to all gold and silver held by the Global Settlement Foundation and remains fully deliverable at all times for any claims that may arise. Given the appalling state of affairs, as a matter of standard procedure, all gold that is delivered into or out of this system will be assayed for purity in full without any exception for all time to come.

It is now possible with advanced technology to put minute, accurately measured quantities of gold into the circulating instruments. Each instrument can then be verified as genuine as to the exact amount of gold in each. In a reversal of the old reasons against circulating gold as money, it is the small denominations that will be notes, the larger amounts being coins. Physical coins for trade will begin as G 400 (approx. 1,125.00 GBP today) and notes down to G 0.01 (that is, down to 1p in value, around 3p at today's gold price). Thinking in Globals is a good substitute for other currencies as it corrects for the recent slide in the purchasing power of other currencies such as GBP, EUR or USD.

Crude Oil 1/1946 to 4/2010 priced in Globals (gold) and US dollars (green)

### Facilitating the transition to lawful markets

We believe that markets of stocks and insurance, denominated in lawful money that is gold, price risk naturally and this is the only way to bootstrap a truly free economy. We

believe that the GSF System can provide a path forward for those who have accumulated significant sums in real metal by the processes of the historical era ending now. This process could be to make initial investments in entrepreneurs who wish to list their stocks with the GSF System, but always holding a minority position to enable the maximum flexibility for the entrepreneur and equally important, to attract gold into the system from elsewhere. This process, supervised by a Court of Record, can, we believe, end the stalemate in the ongoing financial war.

### **Who we are not and what interests us**

We are not connected with, or sponsored by, any government, bank, banker or intelligence agency. All those entering the GSF System will have to declare that their source of funds is free of fraud and crimes against humanity. We are interested in common law and lawful, deliverable money and true markets that feature *finality of settlement*.

### **Facts and questions before the Court of Record**

The *Global Isles Court of Record* is a true sovereign court as designed by the **Magna Carta** where the court operates with no legislative presumptions, where the tribunal is independent of the magistrate, with jurisdiction to determine if the *fiduciary trust* towards the people that is held by the government and its instrumentalities, the banks and courts, has been breached. The *Global Isles Court of Record* has raised issues regarding the current system of banking which are pertinent to examination of the source-of-funds for all transactions.

### **Fraudulent finance**

1. Bank fraud, fraudulent deception, fraudulent conversion and ***running of limitations*** by banks in general, which result in a system where the notes on deposit at the banks are the promissory notes of the borrower, where the banks do not risk funds, and **the banks are the borrowers of the money-of-account in circulation**; and,
2. How, by design, when the banks 'stop lending', the total quantity of the money-of-account in circulation plunges<sup>3</sup>, creating a 'financial crisis'; and,
3. How, by design, **it is guaranteed that the so-called 'borrowers' will 'default'** while the true borrower, the bank, gets to take all the property; and,

---

<sup>3</sup> <http://www.telegraph.co.uk/finance/newsbysector/banksandfinance/3685332/BIS-warns-of-collapse-in-global-lending.html>

4. How, by design, such a financial crisis ensures that private property is transferred by deception to bank insiders, how stocks of 'public' and private corporations become 'bankrupted' enabling wholesale transfer of assets to those suitable ready with the spoils of bank fraud; and,
5. How, by design, the auction of government bonds amount to an exchange of bank-liabilities to pay legal tender for the government's future liability to pay legal tender, and how a “bailout” amounts to outright transfer of liabilities from one balance sheet to another funded by confiscation of private property that is taxation; and,
6. How, by design, the central bank earns these government bonds, and pledges this as collateral for the printing of legal-tender “cash”; and,
7. How, thus, **by design, it is impossible for banks to pay legal tender for the total quantity of bank-liabilities to pay paper legal tender.**
8. This raises the question as to *who* has granted the charter of the central bank, who owns the shares, and the fiduciary responsibilities of such. It also raises the question if insiders to these institutions have used off balance sheet entities to sequester bank-liabilities in circulation by extra-legal methods.
9. This raises the question if the so-called *drug war* is an artifice to remove the cash liabilities of a certain central bank from within the 'nation' under their control and further questions as to what this cash has been used to fund once laundered through the banks of other 'nations'. Is the charter of this central bank a 99 year charter?
10. This raises the question of if the entire system can be reduced to a **system of void-contracts**, where the *law of voids* would apply to the situation.

The *Global Isles Court of Record* has also raised questions as to **who can claim to represent the men and women on the land:**

1. How, by incorporation, the so-called nations and even members of parliament or congress are really private corporations; and,
2. How, **by acts *ultra vires*, “government” corporations create a pyramid of currency** based on deceiving the retail 'borrower' into depositing money-of-

account into circulation; and,

3. How, by examination of a government's money, one can determine if a government is at war, vanquished, or at peace. **Thus raising the question if Your Excellencies' government is at war or is vanquished?** It is evident that every government on the planet is either vanquished or at war. If Your Excellencies' government is at war, with whom? If it has been vanquished, by whom?

### More questions

Questions if purported representatives have committed acts *ultra vires* and acts of treason? Questions as to how the *Mixed Money Case of 1604* and other precedent for *financial war* apply to this situation? Questions if those who purport to be law enforcement have been tricked into enforcement of corporate rules of corporations masquerading as the government of various nation states, rather than enforcing *lex terrae*, common law? Questions if all the **government courts worldwide have been complicit in the fraud of substituting corporate law for common law?** Questions **if such government corporations** are providing an artifice and shelter for the propagation of fraud against the people on the land and **are trafficking in persons?** Questions as to *who* has granted the charter of these government corporations and banks what the rights and responsibilities of the shareholder and the grantor of the charter. Questions if the so called United Nations, itself a legal fiction, has any lawful authority whatsoever? Questions if the so-called newly independent countries are actually independent or monetarily vanquished? Questions as to **who controls the gold stolen by a century of war and financial fraud?** Questions if the latest geophysical weapons are on the loose, in use, and in the hands of those who cannot be trusted with a penny? These and other questions are pending before the *Global Isles Court of Record*. This and other Courts of Record are in motion to discover the truth.

Metaphorically, these questions amount to asking *who* shall pick up the pieces when the flotilla of corporate nation states under admiralty law charges full steam ahead into rocks of reality around the lighthouse of common law<sup>4</sup>. Either man holds a *court of record* or man will be hauled by Nature Herself into Her Court of Record that is always in session.

---

<sup>4</sup> An old Navy joke: [http://www.navy.mil/navydata/navy\\_legacy\\_hr.asp?id=174](http://www.navy.mil/navydata/navy_legacy_hr.asp?id=174) playing out in real life. Common law is Nature's law.

## The alternative: A bright future

Within the GSF System is the Super Wide Area Network by Satellite (SWANSAT). SWANSAT<sup>5</sup> requires 18 billion Globals (1800 metric tonnes of gold) in investment and would create an independent worldwide communication infrastructure that would integrate the world into an economic system that is actually free and lawful. SWANSAT and similar projects can bring investment, technology and innovation to those that embrace it.

Lawful markets where joint stock companies take risks, priced in money that is gold and silver is the genius of English Civilization. Such a debt free civilization would harvest the bounty of nature for the good of its people. Clearly, those who succeed in investing lawful money, using a lawful system of trade, will live a life of security and prosperity. Producers will have sustainable levels of working capital, the courts would be those of the common law and perhaps suppressed technology would emerge to satisfy the wildest dreams of man.

We are ready to work with any interested parties who wish to participate in a voluntary gold standard, which would be a restoration of sanity amidst considerable insanity.

Yours faithfully,

*Joseph Ray Sundarsson*
